THE FUTURE OF HIGH PERFORMANCE SEALING HAS ARRIVED

Patented FISHBONETM

- 1,000,000 times lower leakage than TA-LUFT Test limit
- 25 times lower leakage than Chevron Fugitive Emissions Test limit
- **Pass** API 6FB Fire Test

A brief history of Metal Gaskets

In 1912, over 100 years ago

• Spiral Wound Gaskets - A great invention for its time

Advantages

- * Combine strength from metal strips with sealing capability from a non-metallic material
- ★ Self-energized by fluid pressure

 → Compare the compare the compared to the compared t

Disadvantages

- * The "un-wind" and crushing problem
- * High minimum sealing load requirement causes bolt yielding and flange rotation

In 1976, over 36 years ago

• Camprofile Gaskets - A good improvement in gasket strength

Advantages

- * Strong, will not un-wind and will not crush
- * Interchangeable with spiral-wound gaskets

Disadvantages

- * Less elastic compared to spiral wound gaskets resulting in poor recovery
- * Sharp teeth bite into flange surfaces causing damage and need to re-surface
- $\ensuremath{\mathbb{X}}$ Not self-energized by fluid pressure

NOW

Fishbone[™] Gaskets

- **X** Balance strength with flexibility
- **X** Interchangable with existing gaskets standards
- ※ Will not damage flanges
- **X** Uncrushable and does not unwind
- * Extremely low minimum load requirements dramatically improve sealing performance

● The Fishbone[™] Gasket Design & Advantages

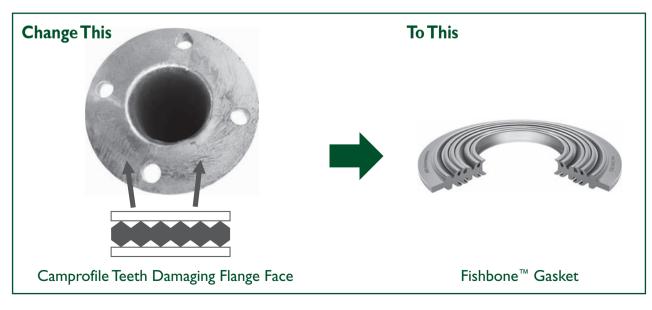

Design

- Helical concentric bevelled ribs,
 each side covered with Graphite, PTFE or Mica
- Unitary design with or without a centering ring
- Rounded, non-sharp contact surface
- Unique Stop-Step design

Advantages

- Internally self-energized and by fluid pressure for better sealing performance
- Interchangeable with all spiral wound gaskets and Camprofile gaskets
- Will not damage flange like Camprofile gaskets and spiral wound gaskets
- Prevents over-compression of sealing element

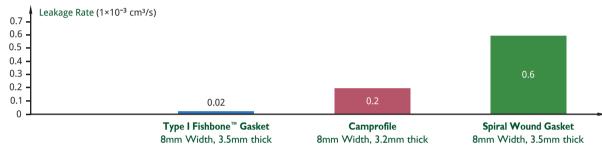

Test Results

Leakage Test - Fishbone[™] Gasket vs. Spiral Wound vs. Camprofile

Test Parameters (ASTM F37) Gasket Stress 30 MPa / 4351 psi | Nitrogen Pressure 4 MPa / 580 psi
 Test Report#: MF-130933 & MF-130935

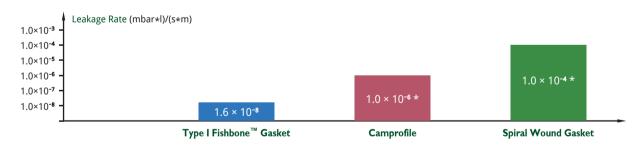

Test Item	Type I Fishbone™ Gasket	Camprofile	Spiral Wound Gasket
	8mm Width, 3.5mm thick	8mm Width, 3.2mm thick	8mm Width, 3.5mm thick
Leakage Rate (1×10 ⁻³ cm³/s)	0.02	0.2	0.6

TA-LUFT Test - Fishbone™ Gasket vs. Spiral Wound vs. Camprofile

• Test Parameters - VDI Guideline 2440 & VDI Guideline 2200

Test Item	Type I Fishbone [™] Gasket	Camprofile	Spiral Wound Gasket
Leakage Rate (mbar*l)/(s*m)	1.6 × 10 ⁻⁸	1.0 × 10 ⁻⁶ *	1.0 × 10 ⁻⁴ *

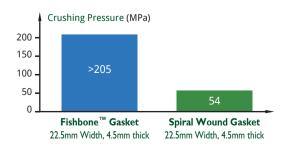

^{*}Average values from accredited international laboratory

The Fishbone™ Gasket is considered to be of **High Grade Performance** according to TA-Luft.

Crush Resistance Test - Fishbone[™] vs. Spiral Wound

 Test Parameters Pressure 205 MPa / 29732 psi Test Report#: MF-130936

Test Item	Fishbone™ Gasket 22.5mm Width, 4.5mm thick	Spiral Wound Gasket 22.5mm Width, 4.5mm thick
Crushing Pressure (MPa)	>205	54

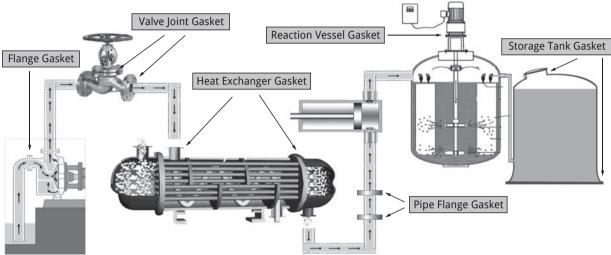

Applications

- Critical Flange Applications
- Low Emissions Sealing
- High Pressure FlangesPiping and Equipment

Steam Sealing

- Fire Safe Requirements
- Direct Replacement of All Spiral Wound Gaskets and Camprofile Gaskets
- Birect Replacement of All Spiral Would duskets and earlipronic duskets

Technical Specifications

Standard Materials

Metal Materials
 304, 304L, 316, 316L, 321

• Non-metallic Sealing Materials

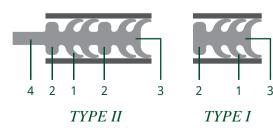

Flexible Graphite, PTFE, Mica

Temperature Range

Facing Material	M inimum °C	Maximum °C	M inimum °F	M aximum °F
Flexible Graphite	-212	400	-350	750
PTFE	-240	260	-400	500
H.T.GR(High Temp. Graphite)	-250	550	-418	1022
ePTFE(Expanded PTFE)	-240	260	-400	500
Mica	-212	1000	-350	1850

Features

- Patented helical concentric bevelled ribs.
 The number of ribs grows with the increasing pressure class.
- Unique Stop-Step design
 Manufactured with single or double stop-steps depends upon the sealing width.
- 3. Self-energized by fluid pressure
- 4. Unitary design with (Type II) or without (Type I) a centering ring

How to Order

Standard Sizes

Imperial

NPS (in): 1/2" ~ 60" CLASS (lbs): 150 ~ 2500

Metric

DN (mm): 10 ~ 2000 PN (bar): 2.5 ~ 400

• International Standard

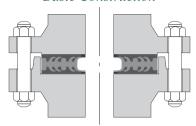

EN 1514	ASME B16.20a	JIS B2404
EN 12560	ANSI B 16.21	JPI-7S-41

BS 4865 API 601

BS 3381 DIN 2690~2692

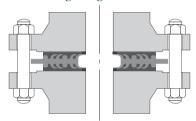

Interchanegable

Basic Construction

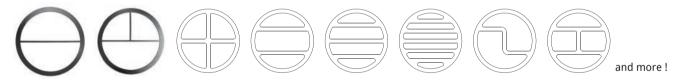

Replaces Spiral Wound Style R, Style RIR & Camprofile Basic Type

Centering Ring Construction

Replaces Spiral Wound Style CG, Style CGI & Camprofile Reinforced Type

Heat Exchanger is available!

AIGI ENVIRONMENTAL INC. inspected this product under experimental conditions. Users shall judge independently whether to use this product, and shall ensure correct storage, installation and application of this product. As such, our company assumes no responsibility with regard to any situation arising from inappropriate storage, installation and application. All products of our company were strictly examined under the relevant national or business standards. Users shall complete checking this product within 30 working days upon receipt of the same. If users discover any problem related to the quality of this product, they shall raise their concerns within the above-mentioned period. If users fail to raise their concerns upon expiration of the above-mentioned period, this shall be treated as full acceptance of the product. Our company guarantees the provision of products of premium quality. Should any dispute arise with regard to the quality of the products, the verification of a third-party authority shall then be required. If any defect in quality is spotted out during inspection upon delivery, our company undertakes to provide a new product of equivalent value. Our company reserves the right to change the manufacturing processes, the materials and sources of the materials without further notification. In addition, our company assumes no responsibility or liability for any unintentional typographical error or omission during printing, or any non-timely update of information. Thank you for your consideration.

^{**} Please consult with AIGI Environmental Inc. for all your standard and non standard gasket requirements.
